

## Author Index

Baiker, A., see Koeppel, R.A. 77

Bonnelle, J.P., see Sohier, M.P. 169

Boorman, P.M., see Lewis, J.M. 103

Chang, C., see Dooley, K.M. 17

Colley, S.E., Copperthwaite, R.G., Hutchings, G.J., Foulds, G.A. and Coville, N.J.  
Cobalt/manganese oxide catalysts: Use of chromium promoters for long chain hydrocarbon production 1

Copperthwaite, R.G., see Colley, S.E. 1

Corma, A. and Mocholi, F.A.  
New silica-alumina-magnesia FCC active matrix and its possibilities as a basic nitrogen passivating compound 31

Coville, N.J., see Colley, S.E. 1

Datye, A., see Zhang, R. 123

Dooley, K.M., Chang, C. and Price, G.L.  
Effects of pretreatments on state of gallium and aromatization activity of gallium/ZSM-5 catalysts 17

Ellis, Jr., P.E., see Lyons, J.E. 1

Figueras, F., see Lequitté, M. 155

Foulds, G.A., see Colley, S.E. 1

Heinemann, H., see Rasko, J. 57

Hu, J.F., see Zhang, R. 123

Huang, Z.-Q., see Zhang, R. 123

Hub, S., see Lequitté, M. 155

Hutchings, G.J., see Colley, S.E. 1

Jaeger, N.I., see Kapicka, J. 47

Jagiello, J., see Zhang, R. 123

Kapicka, J., Jaeger, N.I. and Schulz-Ekloff, G.  
Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

Klinowski, J., see Sulikowski, B. 141

Koeppel, R.A., Baiker, A. and Wokaun, A.  
Copper/zirconia catalysts for the synthesis of methanol from carbon dioxide: Influence of preparation variables on structural and catalytic properties of catalysts 77

Kydd, R.A., see Lewis, J.M. 103

Lequitté, M., Figueras, F., Moreau, C. and Hub, S.  
Deamination of sec-butylamine over acidic zeolites 155

Lewis, J.M., Kydd, R.A., Boorman, P.M. and Van Rhyn, P.H.  
Phosphorus promotion in nickel-molybdenum/alumina catalysts: Model compound reactions and gas oil hydroprocessing 103

Lyons, J.E. and Ellis, Jr., P.E.  
Azide activation of metallophthalocyanine complexes for the catalytic oxidation of alkanes in the liquid phase 1

Marcq, J.P., see Sohier, M.P. 169

Mocholi, F.A., see Corma, A. 31

Moreau, C., see Lequitté, M. 155

Price, G.L., see Dooley, K.M. 17

Rasko, J., Somorjai, G.A. and Heinemann, H.  
Catalytic low-temperature oxydehydrogenation of methane to higher hydrocarbons with very high selectivity at 8–12% conversion 57

Schulz-Ekloff, G., see Kapicka, J. 47

Schwarz, J.A., see Zhang, R. 123

Sohier, M.P., Wrobel, G., Bonnelle, J.P. and Marcq, J.P.  
Hydrogenation catalysts based on nickel and rare earth oxides. I. Relation between cations nature, preparation route, hydrogen content and catalytic activity 169

Somorjai, G.A., see Rasko, J. 57

Sulikowski, B. and Klinowski, J.  
Preparation and characterization of titanosilicates with ZSM-5 structure 141

Van Rhyn, P.H., see Lewis, J.M. 103

Wokaun, A., see Koeppel, R.A. 77

Wrobel, G., see Sohier, M.P. 169

Zhang, R., Jagiello, J., Hu, J.F., Huang, Z.-Q., Schwarz, J.A. and Datye, A.  
Effect of  $WO_3$  loading on the surface acidity of  $WO_3/Al_2O_3$  composite oxides 123

## Subject Index

**Acid sites**  
 Effect of  $\text{WO}_3$  loading on the surface acidity of  $\text{WO}_3/\text{Al}_2\text{O}_3$  composite oxides 123

**Acid sites**  
 Deamination of sec-butylamine over acidic zeolites 155

**Acidity**  
 Effect of  $\text{WO}_3$  loading on the surface acidity of  $\text{WO}_3/\text{Al}_2\text{O}_3$  composite oxides 123

**Alumina**  
 Effect of  $\text{WO}_3$  loading on the surface acidity of  $\text{WO}_3/\text{Al}_2\text{O}_3$  composite oxides 123

**Aromatization**  
 Effects of pretreatments on state of gallium and aromatization activity of gallium/ZSM-5 catalysts 17

**Butylamine deamination**  
 Deamination of sec-butylamine over acidic zeolites 155

**Calcium–nickel–potassium**  
 Catalytic low-temperature oxydehydrogenation of methane to higher hydrocarbons with very high selectivity at 8–12% conversion 57

**Carbon dioxide hydrogenation**  
 Copper/zirconia catalysts for the synthesis of methanol from carbon dioxide: Influence of preparation variables on structural and catalytic properties of catalysts 77

**Carbon monoxide hydrogenation**  
 Cobalt/manganese oxide catalysts: Use of chromium promoters for long chain hydrocarbon production 1

**Catalyst characterization (FT-IR, NMR, SEM, TEM, XRD)**  
 Preparation and characterization of titanosilicates with the ZSM-5 structure 141

**Catalyst characterization (nitrogen physisorption, nitrous oxide titration, SEM, TEM, TG/DTA, TPR, XRD)**  
 Copper/zirconia catalysts for the synthesis of methanol from carbon dioxide: Influence of preparation variables on structural and catalytic properties of catalysts 77

**Catalyst preparation (co-precipitation, deposition precipitation, impregnation, ion exchange)**  
 Copper/zirconia catalysts for the synthesis of methanol from carbon dioxide: Influence of preparation variables on structural and catalytic properties of catalysts 77

**preparation variables on structural and catalytic properties of catalysts 77**

**Catalyst preparation (coprecipitation, evaporation)**  
 Hydrogenation catalysts based on nickel and rare earth oxides. I. Relation between cations nature, preparation route, hydrogen content and catalytic activity 169

**Catalyst preparation (rutile)**  
 Preparation and characterization of titanosilicates with ZSM-5 structure 141

**Cerium**  
 Deamination of sec-butylamine over acidic zeolites 155

**Chromium promoter**  
 Cobalt/manganese oxide catalysts: Use of chromium promoters for long chain hydrocarbon production 1

**Cobalt/manganese oxide**  
 Cobalt/manganese oxide catalysts: Use of chromium promoters for long chain hydrocarbon production 1

**Coke deposition**  
 Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**Copper/zirconia**  
 Copper/zirconia catalysts for the synthesis of methanol from carbon dioxide: Influence of preparation variables on structural and catalytic properties of catalysts 77

**Cracking catalysts**  
 New silica–alumina–magnesia FCC active matrix and its possibilities as a basic nitrogen passivating compound 31

**Cyclohexanol oxidation**  
 Preparation and characterization of titanosilicates with the ZSM-5 structure 141

**Cyclohexanone**  
 Preparation and characterization of titanosilicates with ZSM-5 structure 141

**Double-stage reactor**  
 Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**FCC**

New silica-alumina-magnesia FCC active matrix and its possibilities as a basic nitrogen passivating compound 31

**Fischer-Tropsch synthesis**

Cobalt/manganese oxide catalysts: Use of chromium promoters for long chain hydrocarbon production 1

**Gallium**

Effects of pretreatments on state of gallium and aromatization activity of gallium/ZSM-5 catalysts 17

**Gasoil cracking**

New silica-alumina-magnesia FCC active matrix and its possibilities as a basic nitrogen passivating compound 31

**Hydrocracking**

Phosphorus promotion in nickel-molybdenum/alumina catalysts: Model compound reactions and gas oil hydroprocessing 103

**Hydrodesulphurization**

Phosphorus promotion in nickel-molybdenum/alumina catalysts: Model compound reactions and gas oil hydroprocessing 103

**Hydrogen spillover**

Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**Hydrogen storage**

Hydrogenation catalysts based on nickel and rare earth oxides. I. Relation between cations nature, preparation route, hydrogen content and catalytic activity 169

**Hydrogenation**

Hydrogenation catalysts based on nickel and rare earth oxides. I. Relation between cations nature, preparation route, hydrogen content and catalytic activity 169

**Hydroprocessing**

Phosphorus promotion in nickel-molybdenum/alumina catalysts: Model compound reactions and gas oil hydroprocessing 103

**Inverse gas chromatography**

Effect of  $WO_3$  loading on the surface acidity of  $WO_3/Al_2O_3$  composite oxides 123

**Large-pore zeolites**

Deamination of sec-butylamine over acidic zeolites 155

**Low-temperature oxydehydrogenation**

Catalytic low-temperature oxydehydrogenation of methane to higher hydrocarbons with very high selectivity at 8–12% conversion 57

**Methanation**

Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**Methane dehydrogenation**

Catalytic low-temperature oxydehydrogenation of methane to higher hydrocarbons with very high selectivity at 8–12% conversion 57

**Methanol synthesis**

Copper/zirconia catalysts for the synthesis of methanol from carbon dioxide: Influence of preparation variables on structural and catalytic properties of catalysts 77

**Nickel**

Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**Nickel-faujasite**

Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**Nickel-molybdenum/alumina**

Phosphorus promotion in nickel-molybdenum/alumina catalysts: Model compound reactions and gas oil hydroprocessing 103

**Nickel-rare earths**

Hydrogenation catalysts based on nickel and rare earth oxides. I. Relation between cations nature, preparation route, hydrogen content and catalytic activity 169

**Nitrogen passivation**

New silica-alumina-magnesia FCC active matrix and its possibilities as a basic nitrogen passivating compound 31

**Phosphorus**

Phosphorus promotion in nickel-molybdenum/alumina catalysts: Model compound reactions and gas oil hydroprocessing 103

**Platinum**

Evidence for hydrogen spillover effect in the deposition of coke on a nickel-faujasite catalyst during syngas conversion 47

**Rutile**

Preparation and characterization of titanosilicates with ZSM-5 structure 141

**Selectivity (higher hydrocarbons)**  
**Catalytic low-temperature oxydehydrogenation of methane to higher hydrocarbons with very high selectivity at 8–12% conversion 57**

**Sepiolite**  
**New silica–alumina–magnesia FCC active matrix and its possibilities as a basic nitrogen passivating compound 31**

**Stability on-stream**  
**Evidence for hydrogen spillover effect in the deposition of coke on a nickel–faujasite catalyst during syngas conversion 47**

**Syngas conversion**  
**Evidence for hydrogen spillover effect in the deposition of coke on a nickel–faujasite catalyst during syngas conversion 47**

**Titanosilicates**  
**Preparation and characterization of titanosilicates with the ZSM-5 structure 141**

**Tungsten oxide**  
**Effect of  $WO_3$  loading on the surface acidity of  $WO_3/Al_2O_3$  composite oxides 123**

**Tungsten trioxide/alumina**  
**Effect of  $WO_3$  loading on the surface acidity of  $WO_3/Al_2O_3$  composite oxides 123**

**Unsaturated hydrocarbons hydrogenation**  
**Hydrogenation catalysts based on nickel and rare earth oxides. I. Relation between cations nature, preparation route, hydrogen content and catalytic activity 169**

**Wax production**  
**Cobalt/manganese oxide catalysts: Use of chromium promoters for long chain hydrocarbon production 1**

**Zeolites**  
**Effects of pretreatments on state of gallium and aromatization activity of gallium/ZSM-5 catalysts 17**

**Zeolites**  
**Preparation and characterization of titanosilicates with ZSM-5 structure 141**

**Zeolites**  
**Deamination of sec-butylamine over acidic zeolites 155**

**ZSM-5**  
**Effects of pretreatments on state of gallium and aromatization activity of gallium/ZSM-5 catalysts 17**

**ZSM-5**  
**Preparation and characterization of titanosilicates with ZSM-5 structure 141**
